

GCP

BASE - BASE

Important de fonctionner sous forme de projet :
creation:

On retrouve la liste de tout nos projet avec la possibilité d'en creer de nouveau

Cancel

L'avantage de tout segmenter en projet est de Separer proprement les environnements (evite de casser la prod) / Gerrer la facturation et les couts (les depenses sont suivies par projet) / Gerrer les accès (IAM) facilement / Isoler la sécurité et réduire les risque / Facilite la maintenance

Basic role dans GCP gestion d'accès au projet

viewer : Exclusion en lecture aucune action n'est executable

editor : Toute les permissions du viewerplus permissions for actions that modify state, such as changing existing resources.

As an editor, you can create, modify, and delete Google Cloud resources. However, you can't add or delete members from Google Cloud projects.

owner : All editor permissions and permissions for the following actions:
manage roles and permissions for a project and all resources within the project;
set up billing for a project.

The screenshot shows the Google Cloud IAM & Admin console. The left sidebar contains the navigation menu with options like Cloud Hub, Cloud overview, Solutions, Recently visited, Favorite products, Products (Billing, IAM & Admin, Marketplace), Labels, Tags, Settings, Privacy & Security, Identity-Aware Proxy, Roles, Audit logs, and Asset Inventory. The main content area displays the 'Permissions for project "qwiklabs-gcp-01-ff705bc818fc"' page. It includes tabs for 'Allow', 'Deny', and 'Recommendations history'. Below the tabs, there are links for 'View by principals' and 'View by roles', and buttons for 'Grant access' and 'Remove access'. A table lists the permissions for the project, including roles like Owner, BigQuery Admin, Storage Admin, Editor, Project IAM Admin, and Viewer, along with their principal names and security insights.

Type	Principal	Name	Role	Security insights
☐	admin@qwiklabs-services-prod.iam.gserviceaccount.com		Owner	12508/12516 excess permissions 1 service account impersonation
☐	qwiklabs-gcp-01-ff705bc818fc@qwiklabs-gcp-01-ff705bc818fc.iam.gserviceaccount.com	Qwiklabs User Service Account	BigQuery Admin	234/234 excess permissions
☐			Owner	12516/12516 excess permissions
☐	student-01-e76bd62fdb1a@qwiklabs.net	student 2974f53b	Storage Admin	92/92 excess permissions
☐			Editor	
☐			Project IAM Admin	
☐			Viewer	
☐	student-01-fa313df3afdc@qwiklabs.net		Viewer	

Grant access to "qwiklabs-gcp-01-ff705bc818fc"

Grant principals access to this resource and add roles to specify what actions the principals can take. Optionally, add conditions to grant access to principals only when a specific criteria is met. [Learn more about IAM conditions](#)

Resource

qwiklabs-gcp-01-ff705bc818fc

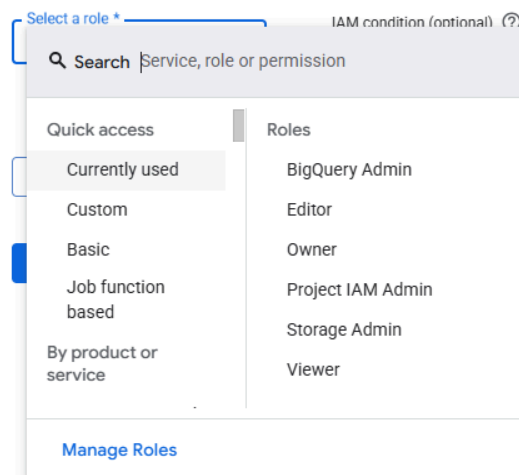

Add principals

Principals are users, groups, domains, or service accounts. [Learn more about principals in IAM](#)

New principals *

Assign roles

Roles are composed of sets of permissions and determine what the principal can do with this resource. [Learn more](#)

Enable API and Services

Sur GCP un projet ne peut pas utiliser n'importe quel service "par défaut" ce qui implique que la plupart des services GCP sont accessibles via une API

- Il faut parfois des droits IAM type **Editor** ou **Service Usage Admin** pour activer des APIs.
- Certaines APIs peuvent entraîner des coûts selon l'usage (même si l'activation seule ne facture pas forcément).
